The Most Comprehensive **OT & IoT** Security Platform

SCADAfence

All of Your OT & IoT Security in One Place

SCADAfence, the global technology leader in OT & IoT security, exists to protect the lives of civilians. By leveraging cutting-edge technology, SCADAfence helps organizations that have limited or no visibility into their OT & IoT environment, to automatically detect all of their assets, to digitalize their inventory, to comply with industrial standards, and most importantly - to make sure that their OT & IoT environments are kept safe from sophisticated cyber-attackers.

A recipient of the Gartner "Cool Vendor" award in 2020, SCADAfence currently protects some of the largest industrial facilities in the world. This includes the largest manufacturing plant in Europe, a Fortune 100 oil and gas enterprise in the United States, and the largest building management system (BMS) operator in Japan.

The 3 Pillars of SCADAfence
Best-in-Class OT Security

Industry Leading Accuracy
Micro-granular adaptive baselining delivers highest detection rate with the lowest false positive rate.

Immediate Time to Value
With flexible deployment options and minimal configuration the platform provides immediate value, with nominal set up time.

Simplicity by Design
Companies of all sizes benefit from a simple user experience, allowing smaller teams to do more things with less resources.

Robust Governance Capabilities

Broadest Coverage
Covering IEC 62443, NERC CIP, NIST and others of remote sites right "out of the box.

Centralized Policy Compliance
Centralized management of remote sites eliminates need for travel and onsite audits.

Complete IoT Coverage

Patented IoT Capabilities
Patented IoT configuration orchestration unifying 100s of management systems into a single platform.

Unified Policy Enforcement
Performs batch operations to ensure policy enforcement across all IoT devices.

Compromised Device Detection
Analyzes IoT data to extract security insights to enable threat detection and vulnerability management.

The SCADAfence Platform
Powerful OT Security

The SCADAfence Platform is an industrial cybersecurity solution that provides visibility and monitoring for ICS/SCADA networks. The platform automates asset discovery and inventory management, as well as threat detection and risk management. By employing a wide range of algorithms, machine learning and AI, the platform detects anomalies and security events that can compromise availability and affect the safety and reliability of the OT network and its assets. The SCADAfence Platform is an award winning solution that has the highest detection rates and the lowest false positive rates in the industry, while maintaining an affordable total cost of ownership (TCO) for all users.

The Added Benefits of the SCADAfence Platform:

Full Visibility - Get visibility into your OT & IoT networks, like turning on the light in a dark room. This helps your organization see all of your devices and how they communicate, while exposing potential attack vectors while improving your network security hygiene.

Automated Asset Management - Get an automated, accurate, asset management service in real-time, which doesn't interfere with your organization's day-to-day processes and operations.

Threat Detection in Real-Time - Passively detect indicators of compromise in real-time, and get early indications of an attack throughout the cyber kill chain.

Immediate Response - Respond immediately to threats by seamlessly integrating with existing security controls and SecOps procedures.

Risk Reduction - Immediately reduce your risk, without changing your existing network or infrastructure.

Remote Access Security – Get full visibility into remote access connections. Track and detect user activities that are out of the user's profile or are malicious in nature.

The SCADAfence Governance Portal
IT/OT Governance Done Right

The SCADAfence Governance Portal measures compliance and monitors the progress made over time across all sites. It identifies all of the gaps and bottlenecks and allows users to generate systematic strategies to improve their organizational security at scale. The platform enables the IT and OT departments to centrally define and monitor the organizational adherence to organizational policies and to OT related regulations. The solution is easily deployed, is not intrusive, and does not jeopardize the process availability in any of the OT sites.

SCADAfence IoT Security
We Solved The Biggest Problem in IoT Security

IoT device fleets are typically multi-vendor, lack central management tools, are insecure by design, and are open to the Internet. This combination increases the risk of IoT devices to be manipulated, and/or to be used as a bridge to compromise the IT or OT network. There are very limited solutions today, which address the challenge of managing and securing IoT devices. Currently, IoT security tools are quarantining suspicious devices, which interferes with production and makes the affected devices unreachable.

SCADAfence IoT Security

The Solution

SCADAfence offers a unique solution to address IoT security challenges with an innovative, centralized platform for IoT endpoint orchestration and management. You don't have to deal with hundreds of malfunctioning or quarantined IoT devices, you can manage and fix any security issues on your IoT devices with a single click. You can also proactively detect exposures to your IoT devices, even before your IoT devices can be compromised. The solution performs central orchestration, and is agentless.

SCADAfence IoT Security's Asset Manager

Technology Eco System

Why Do Our Customers Love Us?

Best security coverage: 100% inspection, adaptive, device based baseline.

Lowest false positives in the industry

Lowest TCO for large distributed deployments

Quickest deployment time, no tuning and baseline restarts, no baseline downtime!

Track (remote) user activity with no additional add-ons

Centrally manage governance of remote sites (IEC 62443, NERC CIP, NIST and others)

Highly customizable: Maps, models, standards and policies, asset DB – for enterprise scenarios

The most advanced IoT support with policy enforcement and central configuration management

Award Winning

In 2020 alone, SCADAfence has won multiple industry awards, including Gartner Cool Vendor and awards for ICS/SCADA Security, Compliance & Critical Infrastructure Protection.

About SCADAfence

SCADAfence is the global technology leader in OT & IoT cyber security. SCADAfence offers a full suite of industrial cybersecurity products that provides full coverage of large-scale networks, offering best-in-class network monitoring, asset discovery, governance, remote access and IoT device security. A Gartner "Cool Vendor" in 2020, SCADAfence delivers proactive security and visibility to some of the world's most complex OT networks, including the largest manufacturing facility in Europe. SCADAfence enables organizations in critical infrastructure, manufacturing and building management industries to operate securely, reliably and efficiently. To learn more, go to www.scadafence.com
