BTS Olympos Virtualization Platform

Vendor Agnosticism

Cost-Effective Licensing

User-Friendliness

Seamless Local Turkish Support

STRATEGIC ADVANTAGES

Strategic Advantages

Flexibility through vendor agnosticism and comprehensive hardware support

Cost Advantage

Low total cost of ownership & high return of investment through cost-effective licensing options

Local Support

Smooth and seamless Turkish local support by expert teams

OPERATIONAL ADVANTAGES

Ease of Use

User-friendly architecture
that allows practical
centralized management

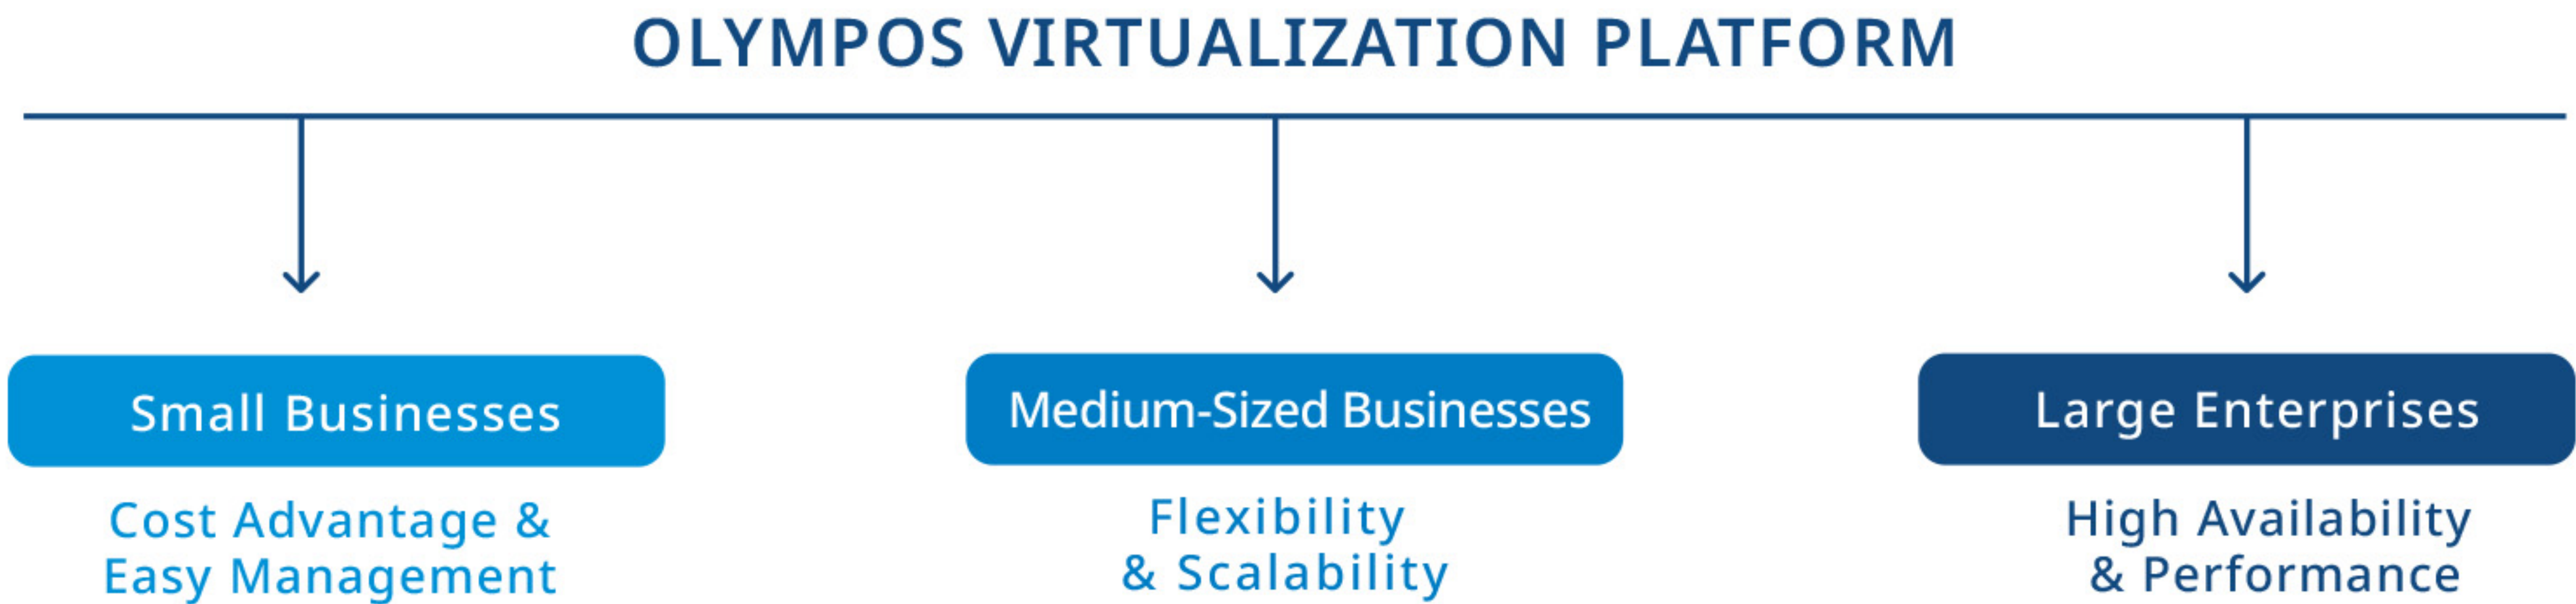

Scalability

Enterprise-level flexibility
by fully adapting to the
needs of businesses of
different sizes.

Consistency

Uninterrupted operations
during failure situations
through failover

FOR WHOM IS IT DESIGNED?

OLYMPOS VIRTUALIZATION LAYERS

MANAGEMENT LAYER

Vendor-Agnostic Architecture

Smart cost management
through vendor agnosticism

Scalability

Flexibility between
master and slave nodes

Simplified Management Layer

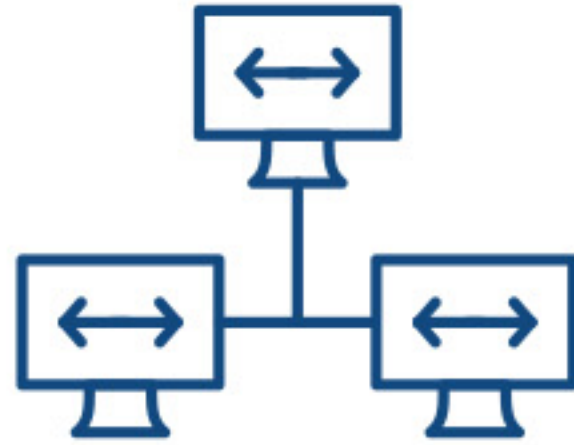

Efficient and reliable management
through a centralized console

Ease of Use

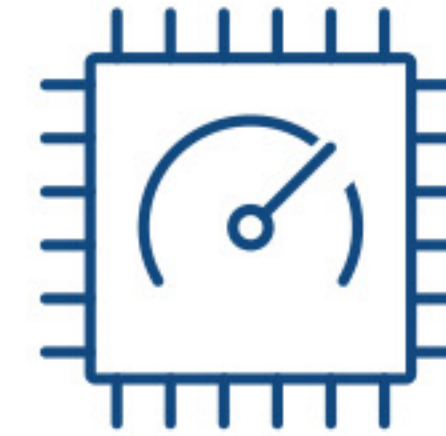

Comprehensive operations
management from a
single interface

NETWORK LAYER

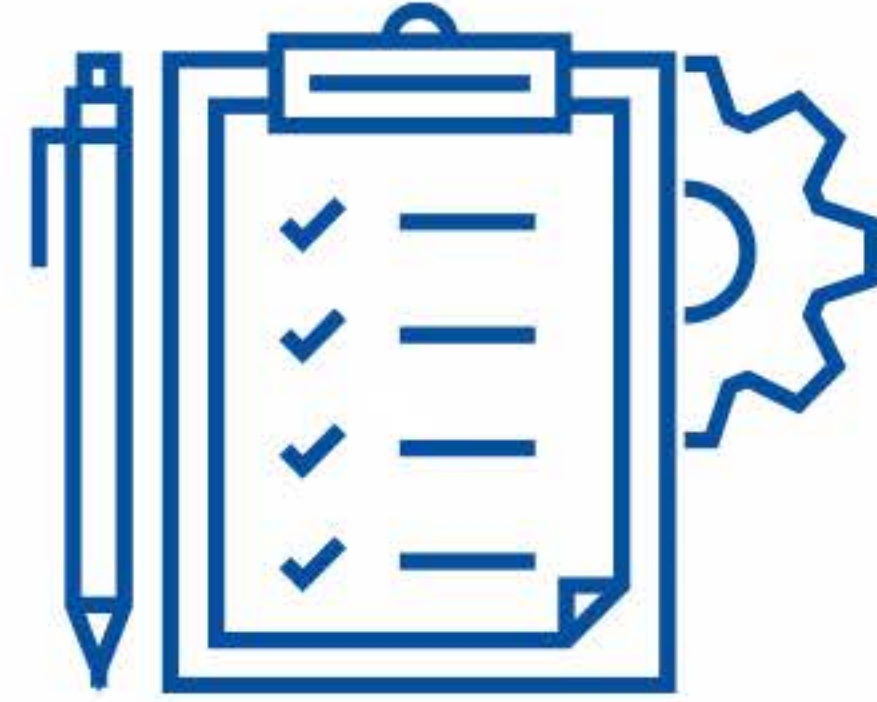

Seamless Connections

High bandwidth and network redundancy through LACP support

Enterprise-Level Maximum Performance

Low latency overlay network structures through VXLAN
