Outpost24

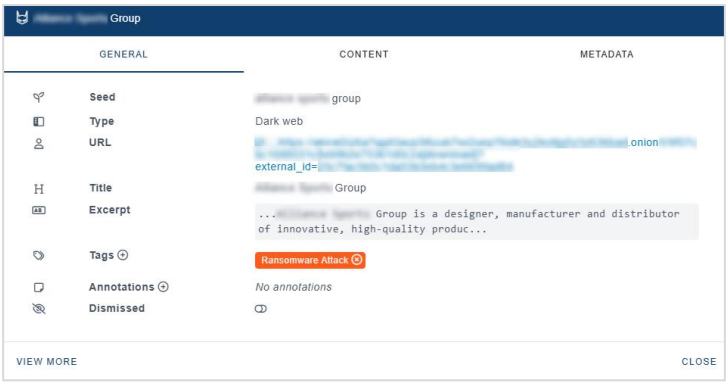
Digital Risk Protection

Cyber threat intelligence to defend your assets and understand your adversaries' plans before they strike.

Today's threat landscape is becoming more and more volatile. Malicious actors use evermore sophisticated techniques to attack organizations. **Any organization operating online holds data valuable to cybercriminals**, from financial transaction records to customer PII, confidential company assets to industrial IP. A hit on any of these can lead to catastrophic business impact, reputational damage and compliance penalties.

Detect and deter external threats to your business with the **Outpost24 Digital Risk Protection** (DRP) solution. DRP covers the broadest range of threats on the market and delivers actionable intelligence to **maximize incident response performance**. The cloud platform's **easy setup** means you gain and maintain **valuable situational awareness instantly**. Empower your security teams with a **central point of control** for automated, operational, tactical, and strategic threat intelligence.

Leaked credentials



Ransomware finding in Dark Web

Key Product Features

- 13+ **years** of historical threat data
- Data gathering from **open, closed, and private sources**
- **In-house Threat Intelligence team** researchers working to provide terabytes of verified data
- Big data analytics with **context and underlying details**
- Plugins available for **SIEMs, SOAR, and TIPs**
- Flexible business model for different **partnerships**, including MSSP programs
- Ongoing partnership with **Cyber Threat Alliance (CTA)**

Guiding you through the threat landscape

- **Who is targeting** your organization, and from where?
- Do you know what your presence is on the **dark web**?
- How has your corporate network been **compromised**?
- Who is **impersonating** your brand or VIPs?
- Has sensitive information been **leaked**?
- Have **credentials** been compromised, are they being used to commit fraud?
- Do you know what your **compliance liabilities** are if you're breached?

About Digital Risk Protection

Dark Web
Boost your awareness of what's going on in the underground, observe malicious activities targeting your organization and proactively prevent future attacks. Gain an advantage by putting an eye in the enemy camp: become better informed about criminals targeting your organization; proactively prepare countermeasures.

Credentials
Find actionable intelligence around leaked, stolen and sold user credentials. We locate them in real-time on the open, deep and dark web, along with information about relevant malware used to steal the information. Outpost24's sinkholes, honeypots, crawlers and sensors are continuously searching for your stolen credentials from leaks, on forums and in real-time from targeted malware, helping eliminate serious attack vectors and fraudulent actions in minutes rather than in months.

Data leakage
Discover if your organization's sensitive documents and source code has been leaked on the internet, deep web or P2P networks, intentionally or not, such as with shared internal documents with poorly-secured file sharing providers.

Social Media
Monitor and check your organization's digital footprint across Web 2.0 repositories, including blogs, forums, websites, and social networks. Find websites not authorized to use your brands and assets claiming partnership affiliation assets and more, so you can take proactive steps to shut them down.

KrakenLabs Threat Intelligence Team
We specialize in providing bespoke, in-depth threat analysis and reports tailored specifically to your organization. Our services equip you with actionable insights into the latest activities from Threat Actors including IOCs, vulnerabilities and TTPs targeting your organization in an easy to digest format. We also offer expert guidance and services on proactive measures to protect your organization including threats coming from the Dark Web, breach analysis, and OSINT assessments, to ensure your organization stays one step ahead of cybercriminals. We also offer expert guidance and services on proactive measures to protect your organization including threats coming from the Dark Web, breach analysis, and OSINT assessments, to ensure your organization stays one step ahead of cybercriminals. Threat Intelligence is part of the risk management requirements for DORA compliance, so KrakenLabs also fits this need.
