CHECK POINT

MDR 360°/ MXDR 360°

A Next-Generation Managed Detection and Response

As hybrid environments become the new norm, organizations face a growing attack surface, complex regulatory demands, and a shortage of skilled security professionals. Check Point's MDR 360° / MXDR 360° is a comprehensive, next-generation managed security service that simplifies operations, accelerates threat response, and delivers unmatched visibility across cloud, endpoint, identity, and network.

Backed by world-class threat intelligence and 24/7 expert monitoring, it empowers security teams to detect and contain threats faster - without the burden of managing multiple tools or vendors. With built-in Identity Threat Detection, integrated SIEM, support for over 160 third-party integrations, and a flexible service model, MDR 360° / MXDR 360° ensures organizations can stay resilient, compliant, and focused on their core business.

Why MDR 360° / MXDR 360°?

End-to-End Coverage
Full visibility across endpoints, cloud, identity, email, and network.

Identity Threat Detection
Stops identity-based attacks before they escalate.

Seamless Integrations
Connects with 160+ products, including third-party EDR, firewalls, and cloud platforms.

Optimized ROI
Security services, threat detection platforms, SIEM, and low cost data lakes.

Faster Response
Automated containment and proactive threat hunting reduce dwell time.
