

Outpost24 MRTI

Turn threat intelligence into action

Outpost24 delivers Machine Readable Threat Intelligence (MRTI) designed to help security teams detect threats faster, automate response workflows, and improve operational decision making at scale.

Offering both a high-volume IOC feed for automated detection pipelines and a strategic intelligence feed enriched with contextual threat data, enabling organisations to operationalise intelligence at scale.

Our MRTI offerings:

IOC Feed

Real time machine readable indicators optimised for automated ingestion into SIEM, SOAR, TIP platforms integration (via STIX/TAXII 2.1).

Strategic CTI Feed

This includes everything in the IOC Feed plus strategic intelligence that turns indicators into actionable intelligence by providing the context behind alerts.

Key Benefits:

- ✓ Faster threat detection and response
- ✓ Reduced analyst workload
- ✓ Improved alert prioritization and fidelity
- ✓ Confidence scoring informed by our in-house threat intelligence team
- ✓ Better visibility into threat campaigns and infrastructure
- ✓ Proprietary, premium, and open-source data curated by our in-house threat intelligence experts.

Integration ready

- Seamless integration into modern security environments:
- STIX/ TAXII 2.1
- SIEM integrations
- SOAR workflows
- Real time feed distribution
