WHY

SALVADOR?

“You Go Back to Your Work in 30 Seconds”

When your critical windows-based device in your business fails, your RTO (Recovery Time Objective) time is 30 seconds by booting through the CRU.

“Your Time and Production Loss Will Be Reduced”

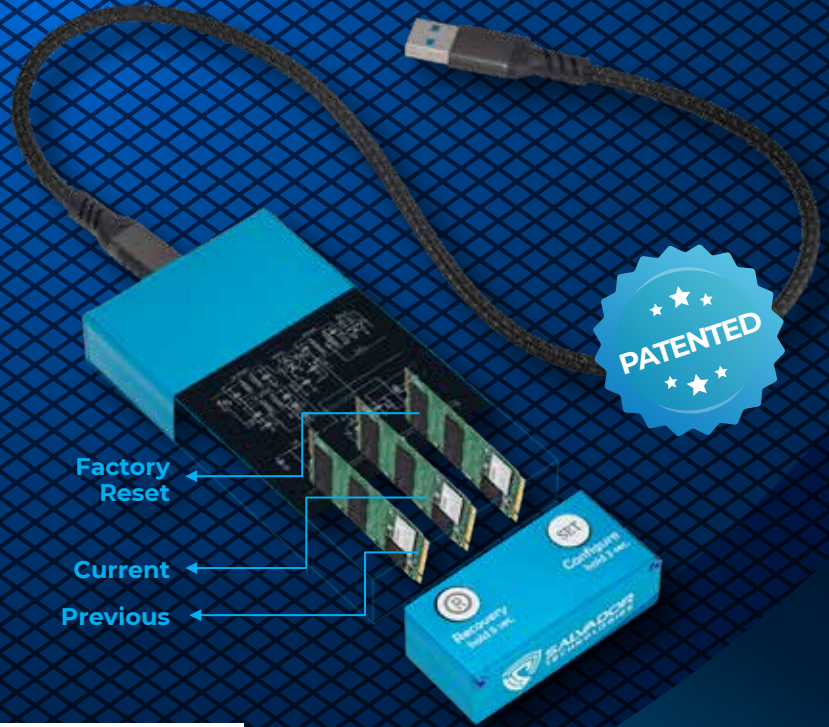

It is important to be able to safely back up the data of your critical devices in automation and return quickly.

“CRU-Operational Continuity and Rapid Recovery Unit”

The CRU unit ensures your operational continuity so that your line managed with critical Windows-based devices in your business does not stop as a result of hardware failure or cyber attack.
